

Sustainable Future of Textile Printing

Digitalizing your Printing Needs

Designing Leadership in Textile Industry with High Quality & High Speed Textile Printing

ColorJet Group - the wide-format digital textile print technology leader, welcomes you to the world of limitless design possibilities.

The company was founded in 1995 and has since been known for its industry-leading performance. It is one of the top global exporters of wide-format printers and provides world-class fabric printing solutions. ColorJet's digital textile machines are revolutionizing the world of textile printing with their robust performance, lowest downtime, high value addition and quick ROI.

ColorJet Group provides an organized, complete solution to meet the requirements of fabric processing houses, printing mills, export houses, and new investors who want to kick start their digital textile printing project foreseeing the fast fashion trends & abrupt reduction of the supply chain. Our experienced team of professionals is here to recommend and give the

total plan of the digital printing project irrespective of the type of fibre (cotton, polyester, nylon, silk, wool), type of inks (reactive, disperse, sublimation, pigment, acid), type of applications (fashion apparels including formal wear, ethnic wear, swimwear, sports wear, home textile, technical textile and many others), size of business or any other customization as provided by the customer.

ColorJet has a global presence. Over 4000 machines have been installed across 450 cities, and its benchmarked performance parameters have established it as a highly reputed and chosen brand worldwide, encouraging ColorJet to compete with the best.

Maintaining its leadership position through its globally reputed deep commitment to Technological Innovation, Strong Outreach & Service Infrastructure, and Complete Customer Focus, the high-productivity machines by ColorJet are designed to meet today's challenges and handle tomorrow's textile production requirements.

를 TIMELINE OF SUCCESS

ColorJet Offers Complete Solution from Pre to Post Treatment in Digital Printing Workflow

ColorJet offers hassle free textile printing process from Multi Chamber Stenter for Chemical Padding, Digital Printer, Star Ager / Loop Ager for proper Steaming & Curing, Print Washing Range to get the washing done on printed fabric, Hydro Extractor for water removal & Vertical Cylinder Dryers for final drying.

Multiple Digital Textile Printing -Versatile solutions across all printing needs

Colorjet Textile Printing Solution Is More Conscious Towards The Environment

The ColorJet textile printing process enables the only truly sustainable and responsible dry printing process with minimal water consumption and water pollution

Minimal water consumption

We always try to make intelligent use of natural resources without compromising the quality.

Sustainable Printing

We believe in eco-sustainable manufacturing that ensures low chemical emissions.

SubliXpress Plus

1.95 Mtr Industrial Sublimation Printer

With a Massive Production Capacity of 9000 sqm/day

Speed, Quality, Reliability and Consistency are the four most powerful pillars of our most advanced 76" Wide industrial dye sublimation printer - **Sublixpress Plus**. Well equipped with Active Seaming Technology and 8 industrial Kyocera print heads, Sublixpress Plus is also available in 4/6/8 color variant. Furthermore, it has a vast production potential of 9,000 sqm/day to intensify your production level.

FEATURES

INDUSTRIAL LEVEL PRINT HEADS – Upto 8 heads in two rows with variable drop size technology for attaining sharp quality at high speed

LEAF CLAMPS – Polished steel clamps placed at either side to prevent paper edges from curling

INK DEGASSING SYSTEM –
To remove bubbles and gas trapped in ink tubes and avoid ink starvation

MULTIPLE BRUSH ROLLERS – To ensure effective wrinkle-free media feeding and take-up

DANCING ROLLER – To provide continuous uniform tension and roll alignment for media from feeding to take up

LINEAR MOTOR – Linear Motor with high precision dual guide rail beam helps improve printing speed and ensure printing accuracy

METAL ENCODER – More precise ink jetting at high speeds, effectively leading to longer service life

HSTR – High Sense Paper Tension Regulator. It detects fluctuation in tension and corrects it almost instantly

TWO STAGE DRYING MECHANISM – To prevent cockling of paper & provide precise ink absorption on the media

AST – Active Seaming Technology for superior quality at high speed

Z ENCODER – For precise head height adjustment when calibrating
